Objective

I enjoy building stuff on the web. Heavily inspired by great products like Wikipedia, Ameba, 4Chan and Craigslist. A useful, resourceful and enjoyable teammate to work with is a person I aspire to be.

Experience

Web Developer, 99.co
August 2019 - present

- Revamped UI for 99 group websites (rumah123.com and 99.co/id).
- Built AMP to improve traffic for certain pages on 99.co/id.
- Helped migrate Vue SPA to React SSR. The migration improves our SEO on mobile web app.

Frontend Developer, Coinone Indonesia
August 2018 - June 2019

- Helped redesign the whole Coinone Indonesia's trading platform gradually without tampering with the existing features using atomic design methodology.

Frontend Developer, Storial
October 2017 - July 2018

- Rebuilt Storial's web application from PHP-based architecture using React and friends.

Ruby on Rails Developer (UI), HarukaEdu
March 2016 - September 2017

- Helped provide UI components built on top of Ruby on Rails using JQuery and friends.

Education

SMA Negeri 4 Bogor
June 2007 - June 2010

Technology Stack

Languages / Preprocessor	Software, Storage, Cloud and Toolings	Libraries / Frameworks
JavaScript, TypeScript, Ruby, SCSS, Pug	Trello, JIRA, Git, Docker, Webpack, GIMP, Digital Ocean	Preact, React, Vue, 11ty

Open Source Project

- I am delighted to write anything that interests me on my blog site. It's not fancy but having no more than is really needed. https://miayam.io
- A practical use of a style guide. https://miayam.io/styleguide
- A minimalist boring 11ty starter project. https://miayam.io/miayam
